

# ISG Integrations

## Do you need a third-party application integrated with iMIS?

We have integrated hundreds of software applications and systems with iMIS over the past 30 years.

You will have an integration that is as seamless as possible, so you can deliver an outstanding online experience to your members and save considerable staff time and effort.

Don't worry about the type of integration needed for your specific situation. Our team lives in the world of integration technologies and protocols — whatever is needed, we have the experience to build your integration. All you need to tell us is what data you want to share between systems.

## CERTIFIED iMIS DEVELOPER

As a Certified iMIS Extension Developer, we make your systems – LMS, CMS, events software, and much more – work together exactly as you want them to.

We have packaged integrations for the most popular applications, like [Zoom](#) and [GoToMeeting](#).

We configure the ASI Single Sign-On where possible. Where that will not work, we have a SAML tool and a token-based tool that we can use. If needed, we can create a custom integration for your exact needs.

Your integration is built with the future in mind. We use industry-standard tools and protocols, so your integration grows with you, providing insurance for the continued effectiveness of your systems.

Contact [sales@isgsolutions.com](mailto:sales@isgsolutions.com) to talk about the integration you need.
